# A place where **you** can make anything

What is a Hackspace? Is it a Community Lab? Co-Working Space? R&D Workshop? Meeting Place? Nottingham Hackspace is a community of practical makers and creatives who want to share ideas and learn new skills. Hackspace is run not-for-profit but for the benefit of makers like YOU whatever your creative interest, craft, electronics, prop and model making, woodwork, programming, robotics and much much more...

Hackspace has large open-plan spaces for events, seminars and workshops as well as smaller spaces for collaborations, creative gatherings and brainstorming. Work alone or with others. With all the infrastructure, space and tools YOU need. Just bring your imagination.

**Free Open Hack Night every Wednesday at 6:30pm.**

Come down, meet us, and bring your skills and knowledge to share.  
Open Hack Night is **free**, and always will be!
